## Columbia on Track for July Launch; Fuel Cell Analysis Completed

Space Shuttle Columbia remains targeted for launch July 1 on the reflight of the Marshall-managed Microgravity Science Laboratory mission. The fuel cell which caused the shortened STS-83 mission in April has undergone extensive analysis and NASA managers have concluded an undetermined, isolated incident caused the slight change in the fuel cell's voltage. The fuel cells will be started earlier during prelaunch to allow for additional monitoring before lift-off.

## Sat. Flying Club Open House Offers Flight Lessons, Rides

Marshall employees, contractors and their families are eligible to use the Redstone Arsenal Flying Activity located on the southwest side of the Redstone Airfield. To make people aware of its services, the activity is holding a free family-oriented open house Saturday from 10 am - 3 pm featuring nominally priced food, airplane rides and flying lessons for all ages. **Contact:** RFA, 881-3980 or 880-9495
